BASCOfield HF: WE INCREASE ROAD SAFETY

High-friction surfaces from Basler Lacke AG are hallmarked by their outstanding anti-skid properties and resistance to polishing thanks to the use of **BASCOfield HF** and the associated anti-skid materials. This results in a substantial reduction in braking distance and contributes to increased road safety. The material offers a wide range of possible applications from private uses to road construction.

TECHNOLOGICAL DESCRIPTION

BASCOfield HF is a rapid-curing solvent-free 2-component cold plastic based on reactive methacrylate resins that is peroxide-curing.

FIELDS OF APPLICATION

High-friction surfaces can prevent traffic accidents or at least reduce the damage they cause. **BASCOfield HF** is used everywhere that increased road safety is required, such as outside schools, on pedestrian crossings, tight bends, crossroads and steep inclines. **BASCOfield HF** can neutralise danger zones on asphalt and concrete surfaces. Thanks to its rapid application and short curing time, it can also be used to upgrade hazardous spots that can only be closed off for limited periods of time.

YOUR ADVANTAGES AT A GLANCE

- Inexpensive safety instead of costly constructional measures
- Reduced braking distance
- Straightforward and fast to implement
- Rapid reopening of road to traffic
- Up to 40% increase in traction compared with normal surfacing
- Awarded with the safety mark by bfu – Swiss Council for Accident Prevention certification

PRODUCT PROFILE

<i>Tested by:</i>	SACR / Skiddometer BV8
<i>Substrates:</i>	Asphalt, concrete
<i>Application:</i>	Two coats
<i>System:</i>	BASCOfield HF base BASCOfield HF granulate Optional: prior treatment of substrate
<i>Colours:</i>	Natural coloured bauxite, other colours on request
<i>Special properties:</i>	<ul style="list-style-type: none"> • Very simple and rapid application • Long-lasting, does not crack • Solvent-free • Resistant to petrol and oil

TEST RESULTS

<i>In accordance with SN 640 511b:</i>	Increased traction up to 40%
<i>Safety mark:</i>	<p>Awarded by bfu – Swiss Council for Accident Prevention</p>  <p><i>Sicherheit · Sécurité · Sicurezza</i></p>

BASLER LACKE AG – MARKINGS AND FLOORINGS FOR MORE SAFETY.

As a manufacturer and provider of road marking, flooring and sealing materials to enhance road safety and building protection, we have been attaching paramount importance to the consistently high quality of our products since 1933. We collaborate closely with our customers and partners and pride ourselves on our flexibility and innovative products. We provide comprehensive system solutions in the realms of road markings, surface markings and floorings. We are always pleased to elaborate custom-tailored solutions on request and with our customers both in Switzerland and abroad.

Headquartered in Buchs, Switzerland, Basler Lacke AG is one of the eight brands that comprise the Berlac Group, a globally active group of medium-sized companies committed to the development and manufacture of top-flight solutions for finishing and protecting surfaces and for colouring plastics.
