

New Ways in Surface Coating

BASCO®field ready mix: COLOUR DESIGN - QUICKLY AND EASILY IMPLEMENTED.

With **BASCO®field ready mix**, road surfaces can quickly and easily be coloured to match your requirements. The product complies with the requirement of the Swiss standard SN640 214 - FGSO / Colourful design of road surfaces. The cold-plastic mass is therefore most suitable for the coloured coating of surfaces in highly frequented traffic areas, such as restricted traffic neighbourhoods with 30s zone, or in front of school facilities, as well as for the realization of areas of building art. The ready to use constitution is ensured through the simple application of the 1-layer system, the high grip and the large choice of colours.

TECHNOLOGICAL DESCRIPTION

BASCO®field ready mix is a solvent-free 2-component cold plastic material based on reactive methacrylate resins (peroxide-curing). The special composition is particularly suitable for surface coatings with high grip and long durability. The application is done by hand.

FIELDS OF APPLICATION

BASCO®field ready mix is a durable coating with high grip, which is suitable for the colour-design of roads, cycle paths, residential areas and much more. The 2-component cold plastic material is delivered "ready-to-use". This allows for a quick and easy application on site, because no additional steps are required prior to application. This ensures reduced dry-time and thereby a faster completion of the work.

YOUR ADVANTAGES AT A GLANCE

- Ready-to-use product
- Complies with Swiss FGSO standards (SN 640 214)
- Simple and quick processing
- Very high grip
- Many colors to choose from

PRODUCT PROFILE

Tested in accordance with/in:	IMP
Surfaces:	Asphalt, concrete
Construction:	Depending on the substrate. Further information in technical data sheet
Application:	Smoothing trowel, rollers
Coverage:	Approx. 4 kg/ m ²
Shades/Hues:	RAL on request
Special features:	<ul style="list-style-type: none"> • Meets Swiss FSGO standards • Achieved high SRT levels • Consistent quality

BASLER LACKE AG – MARKINGS AND FLOORINGS FOR MORE SAFETY.

As a manufacturer and provider of road marking, flooring and sealing materials to enhance road safety and building protection, we have been attaching paramount importance to the consistently high quality of our products since 1933. We collaborate closely with our customers and partners and pride ourselves on our flexibility and innovative products. We provide comprehensive system solutions in the realms of road markings, surface markings and floorings. We are always pleased to elaborate custom-tailored solutions on request and with our customers both in Switzerland and abroad.

Headquartered in Buchs, Switzerland, Basler Lacke AG is one of the eight brands that comprise the Berlac Group, a globally-active group of medium-sized companies committed to the development and manufacture of top-flight solutions for finishing and protecting surfaces and for colouring plastics.
